

JASON JONES

Bowling Green, KY • (270) 791-7808 • Jason.jones2119@gmail.com

Cloud & IT Enthusiast • Seeking Remote Entry-Level AWS Role • Open to Relocation

PROFESSIONAL SUMMARY

Motivated cloud-technology enthusiast with a newly completed Associate of Arts degree and hands-on experience building automation pipelines using GCP, Cloud Run, and REST APIs. Currently enrolling in a Bachelor of Science in AWS Cloud Engineering at WGU beginning August 2026. Demonstrates a strong background in operations, security, logistics, and customer-facing environments — translating readily into cloud support, infrastructure monitoring, and technical service roles. Holds an active Secret Security Clearance background (earned 2007). Seeking a remote entry-level cloud or IT role where I can grow certification credentials while contributing real value from day one.

TECHNICAL SKILLS

Cloud & Infrastructure:	GCP (Cloud Run, IAM, APIs), AWS (Fundamentals), REST APIs (consumed and debugged), Automation Pipelines (Make.com)
Automation & AI Tools:	Make.com, Google Gemini AI, ElevenLabs, Creatomate, Google Sheets API
Development:	Python (basics), JavaScript (basics), Linux / Ubuntu CLI, Git, VS Code
Certifications In Progress:	AWS Certified Cloud Practitioner, Microsoft Azure AI Fundamentals (AI-900)
Core Competencies:	Operations Management, Security Monitoring, Financial Reporting, Team Training, Customer Service

EDUCATION

Bachelor of Science – AWS Cloud Engineering

Enrolling August 2026

Western Governors University (WGU)

- 12-month acceleration plan targeting AWS & Azure GCP certifications alongside degree coursework.

Associate of Arts

May 2026

Southcentral Kentucky Community & Technical College (SKYCTC)

- Graduated May 11, 2026.

HANDS-ON CLOUD PROJECTS

Faceless Content Engine – Automation Pipeline | Personal Project

2024 – Present

- Architected a three-scenario Make.com pipeline automating YouTube content: AI script generation (Gemini), voice synthesis (ElevenLabs), video rendering (Creatomate), and YouTube publishing.
- Deployed a GCP Cloud Run token-service (veo-token-service) to authenticate Veo 2.0 video generation API calls, working through IAM credential flows and OAuth 2.0 token management.
- Debugged JSON parsing, HTTP module variable-mapping, and REST API authentication failures in a cloud-hosted environment — core skills directly applicable to cloud support and DevOps roles.
- Integrated Google Sheets API as a data layer to store scripts, track render status, and log publish metadata across pipeline stages.

WORK EXPERIENCE

Night Audit

2022 – 2024

Home2 Suites | Bowling Green, KY

- Managed all nightly operations including guest check-ins, check-outs, and departmental coordination.
- Prepared and balanced financial reports nightly, ensuring full accuracy and regulatory compliance.

- Resolved guest concerns promptly, maintaining high satisfaction scores.

Concierge

2022

Holiday Inn | Bowling Green, KY

- Managed guest reservations, financial reporting, and credit verification for high-value accounts.
- Processed tax-exempt and third-party account payments; resolved billing discrepancies.
- Delivered brand-consistent service through proactive problem-solving and clear communication.

Security Officer

2018 – 2021

Southern Kentucky Community & Technical College | Bowling Green, KY

- Monitored activities across five campuses via live patrols and video surveillance feeds.
- Maintained emergency equipment (AED, fire extinguishers, chemical safety stations) and accurate incident records.
- Completed ongoing training: active shooter response, CPR, OSHA, Title IX, and pepper spray certification.

Sales Associate

2014 – 2018

Men's Wearhouse / Zales / Best Buy | Bowling Green, KY • Austin, TX

- Delivered high-volume sales, custom fittings, and product consultations across retail environments.
- Resolved customer disputes and implemented brand recovery strategies to retain loyalty.
- Handled special orders, internet fulfillment, and cross-department coverage as needed.

Boatswain's Mate / Logistics Coordinator

2007 – 2013

U.S. Army | Newport News, VA

- Coordinated logistics and training programs for 280 soldiers; developed instructional materials and delivery formats.
- Evaluated training effectiveness and implemented corrective programs when performance benchmarks were not met.
- Adapted rapidly to changing mission environments — directly applicable to dynamic cloud infrastructure work.
- Acquired Secret Security Clearance (2007).

ADDITIONAL

Secret Security Clearance background (2007) • Remote-ready with dedicated home office setup • Experienced Linux/Ubuntu user • Interests: cloud architecture, automation, AI tools, and continuous skill-building
